

SMART ESR Interface

Seamless connectivity and synchronisation with ESR.

Unlike any other solutions, the unique SMART ESR bi-directional interface can synchronise employee, absence and payroll information ESR data twice a day.

Following SMART's selection as preferred rostering and time & attendance solution provider for the national ESR programme, by McKesson in 2001, we have worked closely with the NHS over the last ten years developing a unique and robust bi-directional interface between SMART's Workforce Management solutions and ESR.

Commissioned and tested by ESR/McKesson this interface has undergone an extensive testing programme, resulting in the system's successful and contractual acceptance and subsequent implementation across a significant proportion of the NHS. SMART is also contracted with ESR to provide and maintain the interface to stringent SLA standards for the term of the ESR contract.

This position is unique to SMART and provides NHS Trusts with the confidence that our solution will continue to operate successfully for as long as they use ESR to pay their staff.

The **SMART ESR Interface** ensures twice daily, that all imported and exported data is securely encrypted to maintain employee confidentiality. Audit records are maintained and users are alerted via extensive reporting facilities of any transaction failures.

The **SMART ESR Interface** provides Trusts with the facility to significantly improve payroll efficiency and maintain 100% data accuracy, all within a future proof solution.

"The Trust went through a full tendering process and chose SMART because it was the only proven solution that offered us an ESR interface."

Jasvinder Boyal, Director of Workforce at
Royal Free Hampstead NHS Trust

Benefits

- Automated employee record synchronisation and scheduling twice a day
- Ensures 100% data accuracy
- Reduces data management costs
- Maintains employee confidentiality with encrypted data transfers
- Suitable for local Trust deployment or with SMART Hosting
- Removes the need for double data-entry
- Only commissioned ESR interface on the market
- Contracted with ESR for provision and maintenance

Features

- Planned Absence and Holiday Entitlement record imports from ESR
- Employee Cost and Employee Skill record imports from ESR
- Automated scheduling
- Robust error logging and transaction management
- Future date change tracking
- Multiple assignments/posts handling
- Securely encrypted data transfers
- Future proof design and architecture

“Over 100,000 NHS staff are currently paid through the *SMART ESR* link, which fully synchronises (bi-directionally) twice daily. SMART is the only solution that completely removes double data-entry across ESR and Rostering.”

Tristan Spencer,
Health Market Director, SMART

SMART is a leading provider of web-based solutions for workforce management. For over two decades, we have been helping our customers to achieve agility and cost efficiency from their greatest asset – their people.

SMART’s integrated solutions for workforce management provide efficient people management anywhere in the world. Developed using Microsoft .NET technology, our zero-footprint web solutions are flexible, reliable, scalable and easy to implement.

From time and attendance through to workforce planning, scheduling, absence management and comprehensive automated reporting, the SMART solution suite offers a wide breadth and depth of functionality. Whether fully installed on site, delivered as a managed or hosted service, the architecture enables organisations to focus on specific areas of priority, and reconfigure the system to meet new challenges.

The core systems are of leading-edge design, enabling planning, data capture, alerts and authorisation to take place anywhere and everywhere you need it. Web-based advanced self-service, touchscreen kiosks and mobile activation via telephony and PDA, ensure that employees can interact with the system wherever they may be.
